

Murillo Fogaça

<Full-Stack Developer />

SOFT SKILLS

I have been a web developer since 2018 and also a mobile developer. I have experience in creating intuitive interfaces, developing **SEO-optimized websites**, and **managing paid traffic**. I focus on **high-performance systems with automated testing, automated deployments, code reviews, hyper-personalization, gamification, and accessibility**. I am always looking for new opportunities and challenges to apply my skills.

EDUCATION

BACHELOR IN SYSTEMS ANALYSIS

Cruzeiro do Sul, São Paulo, SP
January 2023 - December 2024

- Responsible for developing the ability to work with the traditional software development lifecycle.
- SDG projects were developed and implemented for communities, and through this, the interaction between technology and society was studied.
- I've acquired insights into project structuring and the distinctions among different team structuring models, which has facilitated a more sophisticated approach to development.

TECHNICAL IT COURSE FOR THE WEB

Etec Fernando Prestes, Sorocaba, SP
January 2016 - December 2018

- Graduated with honors.
- I attended classes on the structuring of digital platforms, web servers, and the functioning of the web.
- I took courses on networking, application development, and web design.
- I have been engaged in studies on data analysis and how they impact the usability of web systems.

EXPERIENCES

FIDÚCIA SCM

APRIL 2022 - MAY 2024

Mobile Developer:

I was involved in the development of the company's mobile applications for both iOS and Android. Additionally, I was responsible for managing deployments, maintaining bug fixes, and extracting reports using Firebase.

Technical Skills:

Development: Flutter with Clean Architecture, Dart, Cupertino + Material
Tracking and Analysis: Firebase

Front End Lead:

At Fiducia, I was responsible for the creation and structuring of web frontend processes for various segments, including credit section, Internet Banking, Onboarding, and the bank's internal structuring, always aligned with business rules.

Initially, we focused on structuring based on the concept of "Banking as a Service." During this period, I developed frontend concepts utilizing this structure, exploring the use of partners and creating highly customized layouts to meet clients' specific needs.

Technical Skills:

Development: React, Vite, Next.js, Angular 11, Prisma, Lumen with MySQL, Composer, PHP 7.4
Tracking and Analysis: Google Analytics, Facebook Ads

YANK

JULY 2020 - APRIL 2021

Full-stack Developer:

At the beginning of the Covid-19 pandemic, I had the opportunity to collaborate with Yank.ag, where I developed integrated systems for e-commerce and websites with content management through dashboards. Additionally, I created e-learning platforms and scheduling systems for gyms. During this period, I worked with major companies in the market, such as Terex, Genie Lift, and Cranes, as well as contributed to smaller projects for companies like Condex and CK Sushi. This experience allowed me to enhance my skills in web development and project management, providing efficient and customized solutions for our clients.

Technical Skills:

Development: WordPress, Codeigniter, Moodle.

SOROCABACOM

OCTOBER 2022 - JANUARY 2023

Full-stack Developer:

For a brief period, I worked at SorocabaCom as the Lead Developer of Applications. My main responsibility was leading the team in developing WordPress websites with a focus on SEO optimization. Additionally, we developed web applications using the Laravel framework, both for CMS and APIs.

We also worked on developing mobile applications with simple functionalities. Initially, we used Ionic in conjunction with Angular 11, and later we migrated to Flutter with Dart. The APIs were developed with Laravel 9, and we managed these applications through web interfaces based on Laravel.

My responsibilities included managing the team throughout the development process, holding meetings with stakeholders, planning sprints, and deploying projects.

Technical Skills:

Development: Ionic with Angular, Angular, Laravel, Flutter with Dart, WordPress, MySQL
Tracking and Analysis: Google Analytics, Firebase

EAGLEX MARKETING

JULY 2019 - JUNE 2020

Front-end Web Developer:

Over the course of a year, I developed websites using WordPress and React for companies in various sectors, focusing on user experience and creating optimized structures to facilitate the exploitation of paid traffic on the web. I placed a particular emphasis on SEO structure, ensuring that the sites were search engine friendly and could attract and convert visitors effectively.

During this period, I obtained certifications in SEO, Google Analytics, SemRush, and Paid Traffic, enhancing my knowledge and skills in these areas. I also created the "Web Punk" product, which focused on web structure for SEO, click tracking, Heatmap, and continuous layout improvements to support various marketing strategies.

Technical Skills:

Development: React, WordPress, MySQL
Tracking and Analysis: SemRush, Hotjar, Google Analytics
